SIL has mainly DI Pipe manufacturing facilities of 2,10,000 MT p.a. and Coke production facilities of 4,50,000 MT p.a.

Outlook

The future of the global steel pipe market looks promising with opportunities in oil and gas, water and wastewater, power generation and other industrial sector. The global steel pipe market is expected to reach an estimated \$68.4 billion by 2024 with a CAGR of 1.6% from 2019 to 2024. The major drivers for this market are increasing construction of new pipelines, replacement of aging pipelines, urbanization rate, and infrastructure development (Refer Market report published by Lucintel).

In India, demand for steel pipes is expected to rise further from several oil and gas pipeline projects and water distribution projects which have been announced and lined up for implementation. Owing to the strong pipeline, order inflows are expected to gain momentum.

One potential risk to the bullish outlook is the escalating trade friction between U.S.A and other countries, which may slow global growth, pressure on oil prices and thereby impacting the growth on new oil and natural gas projects.

Jindal Saw Limited being the only company having a diversified product range with multi-locational manufacturing facilities catering and supporting the growing infrastructure sectors like water, oil & gas as well as other industries like automobile and power, is set to grow with the growth in the Indian and Global economies. As a growth strategy, the Company is making conscious efforts to move towards adding more value-added products.
